## PROFILE

Cybersecurity-governance practitioner working where GRC, AI, and maritime critical infrastructure meet. As IT Lead and Company Security Officer at a Gulf-of-Guinea maritime firm, I own cyber risk management and GRC across a multi-vessel offshore fleet, authoring NIST CSF and ISM Code-aligned policy, IMO cyber-risk compliance, and audit readiness. ISC<sup>2</sup> Certified in Cybersecurity, ISPS Company Security Officer, and PMI-trained, with formal machine-learning and data-science training and shipped AI engineering work. My focus is the governance of AI as it enters safety-critical maritime systems, brought from a Global-South vantage the field rarely includes.

## AREAS OF FOCUS

- **AI governance & risk** — assurance, evaluations, standards, and systemic-risk analysis for critical-infrastructure AI
- **Governance, Risk & Compliance** — security-policy authorship, audit, and remediation roadmaps
- **Maritime cyber risk** — IMO MSC-FAL.1/Circ.3 and Res. MSC.428(98), ISM and ISPS Codes, NIST CSF
- **Applied AI/ML literacy** — machine learning (Vector Institute), Python and R, MCP/agent tooling
- **Research & analysis** — reproducible pipelines, comparative genomics, statistical rigour
- **Stakeholder translation** — technical writing; bridging operators, regulators, and engineers

## PROFESSIONAL EXPERIENCE

### IT Lead & Company Security Officer — Jetense Consultants Limited

Jul 2024 – Present

*Port Harcourt, Nigeria · maritime / offshore oil & gas*

- Serve as Company Security Officer, owning GRC and cyber risk management across a multi-vessel offshore fleet.
- Authored a full enterprise security policy suite aligned to NIST CSF and the ISM Code; delivered a cybersecurity audit with a remediation roadmap and IT disaster-recovery plans.
- Established the firm's first cybersecurity-awareness programme; trained 50+ onshore and offshore crew in threat mitigation.
- Lead the OEM technical interface and oversight; deployed SmartVessel implementation fleet-wide.

### System & Information Officer — Jetense Consultants Limited

Sep 2023 – Jul 2024

- Maintained audit readiness for class, flag, and HSE compliance through complete, traceable technical documentation.
- Delivered crew cybersecurity-awareness training and secure-communication SOPs, lowering operational risk.
- Built requisition-lifecycle trackers across vessels, improving procurement visibility and turnaround.

### Data Analyst — International Breweries Plc / AB InBev Africa

Oct 2019 – Feb 2020

- Supervised 24/7 Level-3 SAP S/4HANA support for ~10 users; standardised remediation procedures.

**Earlier:** Data Analyst & IT Support, Serenity Legal Union & Partners (2021–2022).

## SELECTED AI & TECHNICAL PROJECTS

- **Microsoft Graph MCP Server** — a 20-tool TypeScript Model Context Protocol server integrating Microsoft Graph (Outlook, Calendar, OneDrive, Teams, SharePoint) with Claude.
- **Local AI stack** — containerised local LLM deployment on WSL2 / Docker.
- **Budget Link Integrity Checker** — 385-line Python tool validating multi-workbook Excel chains.
- **Public maritime-cyber work** — NIST CSF-to-ISM Code policy mapping and security tooling (portfolio: [kelvinuduma.github.io](https://kelvinuduma.github.io)).

## RESEARCH

### Graduate Research Assistant — Prof. G. E. Nwofia's Lab, MOUAU

Mar 2024 – Present

- Lead author, "Genetic Diversity Assessment of *Carica papaya* L. Accessions from Southern Nigeria," *Nigerian Journal of Horticultural Science* (2026).

- Characterised 60 accessions (PCA, cluster analysis, heritability  $h^2 \geq 90\%$ ); comparative genomics and synteny across *C. papaya*, *A. thaliana*, and *B. oleracea* (NCBI). Python and R.
